

Do I need to be tested for COVID-19?

If you meet the criteria below

Experiencing COVID symptoms

Had close contact with an infected person

Call your doctor

If you do not get an immediate response & you are experiencing severe symptoms. . .

Call your local hospital, emergency room, or urgent care for assistance.

If your doctor sends you for testing. . .

If your doctor does not feel your symptoms warrant testing. . .

Follow your doctor's directions and isolate at home until symptoms resolve.

Report to the nearest testing facility. A specimen will be collected and sent to a lab.

Self-quarantine until your doctor provides test results.
