## The Quiet Crew ASL Club

### **Busy Hands, Busy Brains:**

What if we could combine physical movement with muscle memory to produce powerful learning? Sometimes we need to change the way we teach to appeal to a variety of learning styles. Take a minute to consider how whole brain learning concepts can appeal to students and teachers. The Quiet Crew concepts are easily implemented into daily instruction and sprinkled throughout the classroom environment to appeal to kinesthetic intelligence.

### **Flexible and Convenient:**

Teachers can decide dates and times for sessions and complete the classes "live" from the safety of their own classroom.

### **Online Follow-up and Review:**

Using our online ASL portal, classroom teachers can access review videos, activities, and resource materials throughout the year.

### **SEL Themed Topics:**

*Quiet Crew* topics can be customizable, however, current lessons are all based on social emotional concepts and differentiated for the classroom that connects to the lessons. Teachers also gain new classroom management skills that can be used the next day with students.

**Subscriptions can be purchased for individual teachers/classrooms or can be accessed through the MVESC Digital Integration Package. The subscription fees for Quiet Crew classes are discounted for groups purchasing for 11 or more classrooms.**

**"Quiet Crew ASL Club Connections" are included in the full-membership to MVESC Distance Learning Services. See membership details for more information.**
