

Comprehensive School Threat Assessment Guidelines (CSTAG) Professional Development Training for School Safety Teams

The CSTAG Model

Evidence-Based Safety

The CSTAG model is a multi-disciplinary team approach to evaluate and respond to student threats of violence. It helps schools distinguish between transient and substantive threats to ensure safety.

Target Audience

School Safety Teams

This training is ideal for administrators, counselors, psychologists, social workers, and SROs. Teams are encouraged to attend together to build a unified and effective assessment process.
